

Full Freight Allowed Program

Attributable to growing demand and new product launches, In-O-Vate Technologies, Inc. has created a Full Freight Allowed (FFA) program for dryer vent service companies. Purchases meeting the total value requirement will ship for free, saving money and increasing bottom line profits.

The geographic region (see below) indicates the minimum dollar amount required to qualify for free shipping. This FFA program is based on East Coast distribution and products ordered must be in carton quantities.

Due to the size, weight, and dimensions of the new roof terminations, DryerJacks will have a slight premium beyond the FFA policy. Orders that meet the FFA minimum that include any quantity of DryerJacks are subject to a \$3/unit freight fee on roof terminations only.

In-O-Vate Technologies Full Freight Allowed program is effective July 23rd, 2013. Companies taking advantage of this free shipping incentive must have goods delivered within the contiguous United States. The FFA Program is only valid for each individual shipping location. Free shipping will not be offered to blanket purchase orders shipping to various locations.

Please contact us with any questions regarding shipping policies, pricing, or general product information. We thank you in advance for your partnership and continued support with our full line of energy efficient products for the laundry room.

Return Policy: Returned products (excluding manufacturing defects) are subject to a 15% restocking fee. The customer is responsible for all returned shipping costs. A Return Authorization number is required prior to shipping. The account will be credited once the returned item(s) are received in our warehouse(s).
